

Peter Msafiri Deo

How is your life at home:

We are all doing good and fine, My mother is still buying and selling milk for a living. I get breakfast and evening meals at home but not every day it depends if my mother get money. After school I help my mother to wash dishes, clean the house then I wash my school uniform and I get time to do my personal studies.

Are you enjoying studying at Baraa

Am happy to be studying at Baraa Secondary because the school has a good and safe environment, school learning materials, good, kind and supportive teachers in class.. I also enjoy playing netball with my friends during our extracurricular time.

How has being sponsored changed your life?

Being sponsored has changed my life, before I used to wear worn out clothes and shoes but now I put on smart clothes and good shoes. I am happy get my school requirements like exercise books, pencil, eraser, school backpack, and pens. Am also happy to get lunch at school and go to school trips with my friends which my mother could not afford to pay.

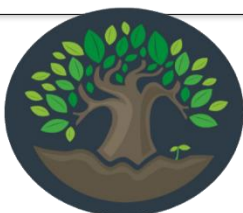

What are your dreams for the future:

In the future I want to be a solder.

Is there anything you would like to say to your sponsor:

How are you and your family doing? I would like to thank you so much for all your supporting me in my academics, knowing that there is someone who cares about me makes me feel good, happy and loved.

I love you and God bless you each day.
