

Lucas Kornel Victor

How is your life at home?

Life at home is good and fine, I live with my mother who is selling corn maize along side Moshono road. We get our meals at home but not everyday. But we often skip meals as my mother has no enough income to buy us food and pay the bills. After school I help my mother to fetch water and wash the dishes. Then I wash my school uniform and get time to study.

How is your academic progress?

My academic progress is good my grades range between B grades and C and this is my last semester in standard five. This November we will be having our last semester examination and if I pass well I will be in standard six with my friends next year. I will be so happy to be in standard six and to have additional of three more subjects to study making a total of 10 subjects. I am so excited to be in the next class.

Are you excited to go on a school trip this November?

I am so happy to go the school trip, we will go to one of the national parks in Tanzania and see different animals like zebras, elephants, crocodile giraffes, monkeys and many more. But I also wish to see lions, hippopotamus, and tiger.

What are your dreams for the future:

I want to be a pilot.

Is there anything you would like to say to your sponsor:

How are you doing?

Thank you so much for sponsoring my education and I am getting school meals every day at school.
